school.

### Search Functionality:

our user has the freedom of search without creating an account (as a guest) , he can search for school s based on one criteria : State . The user can type in the name of the state he resides in , which will display the schools that are registered in our website that are also near to him .

Additionally we made sure the user could browse freely to select a school of his own choice based on the next point which is Information Display.

## Search Functionality and Information Display

---

actors

admin

student

school.

Information Display :  
Users would be compelled to sign up with an account in order to interact , that's by creating an account with name , age , email and a password .

# Information Display

actors

admin

student

school.

Once a school is registered and accepted into the platform it will be displayed when searched ( the state its located in ).

Each school listing will include the essentials information , such as the school's name , address , email , phone number . their schedule and additionally a profile for the teachers with sufficient informations (name , age , gender).

## Interactive Features :

- To elevate the connection and interactivity between users , each student will be able to rate the school he is subscribed in and leave a review based on his proper learning experience craving an easier path for future users.
- Schools will have the ultimate ability to modify their profiles , that includes adding and removing teachers and also editing their sessions planning . With that providing the important element of innovation by staying always on track.
